Application to enrol in a Queensland state school

This sheet contains information on how to complete the Application for student enrolment form (SEF-1 Version 8).

Entitlement to enrolment

Under the *Education (General Provisions) Act 2006 (Qld)* a state school must enrol a prospective student if they are entitled to enrolment. While not exhaustive, the following matters may affect a prospective student's entitlement to enrol in a state school:

- if the school has a School Enrolment Management Plan or an Enrolment Eligibility Plan (enrolment is subject to eligibility under the plan)
- the applicant is a prospective mature age student (the applicant can only apply for enrolment at a mature age state school and will be subject to a satisfactory criminal history check, or as a student in a program of distance education. All prospective mature age students must have a remaining allocation of state education.)
- the prospective student is not of correct age for enrolment (relates to Preparatory Year and Years 1 to 6)
- the prospective student has been excluded, or is subject to suspension from a state school at the time of the application
- the school principal reasonably believes that the prospective student presents an unacceptable risk to the safety or wellbeing of members of the school community (application is referred to the Director-General)
- the school is a state special school and the prospective student does not meet the criteria for enrolment in a special school
- the proposed enrolment requires approval as part of a flexible arrangement under s.183 of the *Education (General Provisions) Act 2006 (Qld)*, and the arrangement has not yet been approved
- the prospective student is not an Australian resident or citizen or the child of an Australian permanent resident or citizen (visa restrictions may apply, fees may be charged, in some cases legislation requires that the prospective student must obtain approval from the Chief Executive via Education Queensland International (EQI) to enrol)
- the school does not offer the year level that the prospective student should be enrolled in
- the prospective student has no remaining semester allocation of state education. Enrolment cannot proceed until additional semesters are applied for by the prospective student (or parent on their behalf) and granted.

Prospective student

A prospective student is a person who has applied to enrol at a state school but who has not yet been accepted for enrolment.

Parent's occupation and education

All parents across Australia, no matter which school their child attends, are asked to provide information about family background (answering this question is optional). The main purpose of collecting this information is to promote an education system which is fair for all Australian students regardless of their background.

Court Orders

Any court orders concerning the prospective student's welfare, safety or parenting arrangements should be provided to the school, and the school should also be provided with any new or updated orders.

Name on enrolment form

A prospective student should be enrolled under their legal name as per their birth certificate. There is provision to also record a preferred family and/or given name. The preferred name will be used on internal school documents such as class rolls. The legal name will appear on semester reports unless there is a specific request to use the preferred name only. This request can come from parents/carers or the student (if the student is independent/mature age).

Gender

Information about gender is supplied to the Federal Government to comply with State funding agreements. The gender category with which a person identifies may not match the sex they were assigned at birth. There is no requirement for a student's gender recorded on this form to align with the sex shown on their birth certificate or passport.

Religious Instruction

Religious instruction is a program approved and provided by a religious denomination or religious society. Other instruction relates to part of a subject area that has been covered within the curriculum and may include, but is not limited to, personal research and/or assignments, revision of class work, and wider reading. Information about religious instruction available at the school, and about other instruction, is provided by the school at the time of enrolment and on the school's website.

Introduction to the State School Consent Form (attached) for Holland Park State School

This letter is to inform you about how we will use your child's personal information and student materials. It outlines:

- what information we record
- how we will use student materials created during your child's enrolment.

Examples of personal information which may be used and disclosed (subject to consent) include part of a person's name, image/photograph, voice/video recording or year level.

Your child's student materials:

- are created by your child whether as an individual or part of a team
- may identify each person who contributed to the creation
- may represent Indigenous knowledge or culture.

Purpose of the consent

It is the school's usual practice to take photographs or record images of students and occasionally to publish limited personal information and student materials for the purpose of celebrating student achievement and promoting the school and more broadly celebrating Queensland education.

To achieve this, the school may use newsletters, its website, traditional media, social media or other new media as listed in the 'Media Sources' section below.

The State School Consent Form may, at your discretion, provide consent for personal information and a licence for the student materials to be published online or in other public forums. It also allows your child's personal information and student materials to be presented in part or alongside other students' achievements.

The school needs to receive consent in writing before it uses or discloses your child's personal information or student materials in a public forum. The attached form is a record of the consent provided.

It should be noted that in some instances the school may be required by the *Education (General Provisions) Act 2006* (Qld) or by law to record, use or disclose the student's personal information or materials without consent (e.g. assessment of student materials does not require further consent).

Voluntary

There will not be any negative repercussions for not completing the State School Consent Form or for giving limited consent. All students will continue to receive their education regardless of whether consent is given or not.

Consent may be limited or withdrawn

Consent may be limited or withdrawn at any time by you.

If you wish to limit or withdraw consent please notify the school in writing (by email or letter). The school will confirm the receipt of your request via email if you provide an email address.

If in doubt, the school may treat a notice to limit consent as a comprehensive withdrawal of consent until the limit is clarified to the school's satisfaction.

Due to the nature of the internet and social media (which distributes and copies information), it may not be possible for all copies of information (including images of student materials) once published by consent, to be deleted or restricted from use.

The school may take down content that is under its direct control, however, published information and materials cannot be deleted and the school is under no obligation to communicate changes to consent with other entities/ third parties.

Information for Students and Parents on School ICT Network Usage

Why are schools providing student access to ICT facilities?

To ensure young Queenslanders are well equipped to contribute fully to the information economy, the education sector is responding to the innovation directions of the Smart State Strategy through Smart Classrooms. This strategy underpins the growth and improvement in innovative programs and resources in schools for teachers and students. Essential tools for providing these innovative educational programs are the intranet, internet, email and network services. These technologies are vital for the contemporary educational program provided in schools. At all times students will act in line with the requirements of the Code of School behaviour and the specific rules of their school.

What is acceptable/appropriate use/behaviour by a student?

It is acceptable for students to use school computers and network infrastructure for – assigned class work and assignments set by teachers; developing appropriate literacy, communication and information skills; authoring text, artwork, audio and visual material for publication on the intranet or Internet for education purposes as supervised and approved by the school; conducting general research for school activities and projects; communicating or collaborating with other students, teachers, parents or experts in relation to school work; accessing online references such as dictionaries, encyclopaedias, etc.; researching and learning through the Department's e-learning environment.

What is unacceptable/inappropriate use/behaviour by a student?

It is unacceptable for students to – use the IT resources in an unlawful manner; download, distribute or publish offensive messages or pictures; insult, harass or attack others or use obscene or abusive language; deliberately waste printing and internet resources; damage computers, printers or the network equipment; commit plagiarism or violate copyright laws; use unsupervised internet chat; use online email services (e.g. Hotmail), send chain letters or Spam email (junk mail); knowingly download viruses or any other programs capable of breaching the Department's networks security.

Usernames and passwords are to be kept private by the student and not divulged to any other individual (e.g. a student should not share their username and password with fellow students). Students cannot use another student or staff member's username or password to access the school's network, including not trespassing in another person's files, home drive or email.

Additionally, students should not divulge personal information (e.g. name, parent's name, address, phone numbers), via the internet or email, to unknown entities or for reasons other than to fulfil the educational program requirements of the school. Students and parents are to employ caution with the use of mobile devices e.g. USBs, particularly as these devices can store significant numbers and sizes of files some of which may be unacceptable at school e.g., games and "exe" files which may contain viruses. Please note that personal files on USBs may be deleted by the Department's malware protection.

What is expected of schools when providing student's with access to ICT facilities?

Schools will provide information in relation to student access to and use of the network and reserve the right to restrict/remove student access to the intranet, internet, email or other network facilities if they do not adhere to the school's network usage and access guideline/statement. Schools will prepare students for the possibility of unanticipated access to harmful information, materials or approaches from unknown persons via the internet or email. Schools will ensure that students are aware of occupational health and safety issues when using computers and other learning devices. Schools that are implementing or have implemented the 1 to 1 Learning Program need to ensure all steps have been taken to provide a safe and effective learning environment for students while meeting the Department's standards for network usage and access security.

What awareness is expected of students and their parents?

Students and their parents should:

- Understand the responsibility and behaviour requirements (as outlined by the school) that come with accessing the school's ICT network facilities;
- Ensure they have the skills to report and discontinue access to harmful information if presented via the internet or email;
- Be aware that:
    - Access to ICT facilities provides valuable learning experiences for students and supports the school's teaching and learning programs;
    - ICT facilities should be used appropriately as outlined in the Code of School Behaviour;
    - The Principal may determine that student privately owned devices may not be used at the school;
    - Students who use a school's ICT facilities in a manner which is not appropriate may be subject to disciplinary action by the school, including restricting network access;
    - Despite departmental systems to manage all access to information on the Internet, illegal, dangerous or offensive information may be accessed or accidentally displayed;
    - Teachers will always exercise their duty of care, but avoiding or reducing access to harmful information also requires responsible use by the student.
